

BATH LIFE 29th February 2008

The innovative Ammique design

The Big Sleep

Local furniture and design company Mainstay Designs has gone global with its sister company's Ammique sleep experience.

It was in September 2004 that the Bath Priory became the first hotel in the UK to offer its guests the benefits of the patented Ammique Bed, which was developed and created by Mainstay Designs. In 2006 the unique bed was

selected by the organisers of Guestroom 2010 as its Bed of the Future across the US and in New York throughout 2006 and 2007.

Now, in Mainstay Design's 25th year, the Ammique Bed is attracting worldwide media and corporate interest. The state-of-the-art bed will soon be available in select locations across the globe.
