# Mainstay designs

## years on...

As you drive up the hill a few yards from Midsomer Norton's High Street heading out of town towards the Mendips; on the right you'll spot the rich claret fascia and contemporary frontage of Mainstay's Design Studio in Silver Street.

Mainstay Designs is a family Company started in 1983 by husband and wife team, Colin and Marlene Greenhalgh. Mainstay's designers, project managers and team of skilled craftsmen have grown in number steadily over time to keep pace with a constant flow of furniture design challenges and building projects.

As Mainstay Designs reaches its 25 year anniversary this year the dedicated team continue to pride themselves on their ability foremost to listen and to work in close partnership with every client in order to find the ideal design solution to create the perfect home and interior to meet each of their client's specific requirements.

*"Many of our clients have become friends, which means a lot to us"*

As well as their work for individual clients, the Mainstay design team have developed and created its own patented Ammique® branded

technology, which is a unique body contouring support and sleep system. In 2006 the revolutionary Ammique® Bed was selected after a worldwide search to feature in GUESTROOM2010 as The Bed of the Future in New York and across the US throughout 2006 and 2007. In March 2007 by special invitation of the DMG group, the mattress-free Ammique® Bed was celebrated as the Cleanest Bed in the World at the Ideal Home Show at Earl's Court in London.

Attracting international media attention and global interest the Ammique® brand of beds, bedding, accessories and bedroom furniture will soon be available in select worldwide locations.

Closer to home the Mainstay Designs team live and love working in Somerset and continue to enjoy working with clients locally to offer the same high level of design expertise and superb craftsmanship on a personal basis.

*"Many of our clients have become friends, which means a lot to us" said Marlene. "It's such an honour to help create a home for someone."*
