

Mainstay Designs celebrate 25 years of design and innovation...

Established in 1983 by husband and wife team, Colin and Marlene Greenhalgh, Mainstay Designs reaches its 25th anniversary this year.

Behind the rich claret fascia and contemporary frontage of Mainstay's Design Studio in Silver Street, Midsomer Norton; the Mainstay team has grown steadily to keep pace with an increasing number of design projects. Offering a comprehensive range of design, manufacture and building services from total renovation works to the installation of bespoke furniture, the Mainstay team relishes the challenges every new project brings.

As you walk into the family company's friendly modern design studio, glossy paneling with examples of the quality of Mainstay's work adorn the white walls and an eclectic mix of designer furniture greets you. The desks and imposing wall to wall Maple office cupboards marry the beauty of traditional craftsmanship with bold accent colours illustrating a fresh approach when it comes to design.

"The majority of all new enquiries are generated by client referrals" Colin says

"indeed, we are well known for our open-kettle policy." At the rear of the main studio the infamous kettle sits in readiness on the granite surface of Mainstay's display kitchen.

Also on show with a vibrant, fused glass backlit headboard is the Ammique Bed; a unique body contouring support and sleep system from the Mainstay design stable. In September 2004 Mainstay Designs launched its sister company Ammique Ltd to promote its exclusive Ammique® branded collections of beds, furniture, bedding and accessories.

The patented Ammique Bed, developed and created exclusively by Mainstay Designs, was selected after a worldwide search by the organizers of Guestroom2010 to feature as The Bed of the Future in New York and across the US throughout 2006 and 2007.

To test rest the Ammique Bed or if you simply want to talk through some ideas about a project you're planning for your home, why not drop into Mainstay's Design Studio. Or if you prefer why not call or email to arrange for a designer to visit you?
